Dear Tanning Salon Customer,

Thank you for choosing disposable eye protection when indoor tanning! We believe that disposable eye protection offers you the cleanest and easiest choice in eyewear.

This product meets the Food and Drug Administration's Good Manufacturing Practices (21 CFR 810) and the FDA's Sunlamp laws for Eye Protection (21 CFR 1040.20).

Ultra Gold WINK-EASE, Lash Room WINK-EASE and WINK-EASE Dark are classified as a Class One Medical product, as are tongue depressors and cotton balls. Just like these products, our disposable eye protection is a Class One Medical product which cannot be re-used without compromising its cleanliness and sanitation. The law requires our product be used only once and then discarded.
